PROFESSIONAL SUMMARY

Security Analyst and Engineer who established and configured the Splunk SIEM environment server as a founding member of the SOC team. Also experienced in Security Posture Assessment (SPA), vulnerability assessment, and 24/7 shift operations performing SIEM monitoring and XDR alert triage/validation across 500+ endpoints—consistently within SLA. Delivered a seven-domain Security Posture Assessment in under three weeks, complete with technical reports and C-level presentations.

CORE SKILLS

Security Engineering: Network configuration and security, Firewall Configuration, Wireless Security Assessment, Remediation Reporting.

Security Operations: SIEM Monitoring (SPLUNK) , XDR Alert Triage and validation (Palo Alto Cortex), Incident Triage and validation, Log Monitoring, Security Event Analysis, Linux server maintainance, Load testing & Performance testing.

Tools & Platforms: Splunk, Cortex XDR, AWS EC2, Nessus, Nmap, Metasploit, Kali Linux, Linux, Shell Scripting, MySQL, Git, Grafana, Docker, Prometheus, Jmeter.

Cloud & Infrastructure: Azure Fundamentals, AWS Fundamentals, Azure AZ-900 Certified, Cloud ACS, CPE Configuration, Firewall Router and Switch Configuration.

Governance & Compliance: ISO 27001:2022, Security Policy Review, Security Awareness, Phishing Awareness Assessment.

Soft Skills: Technical Reporting, Problem Solving, Team Collaboration, Time Management, Adaptability.

Languages: Malay Native/Fluent, English Professional Proficiency.

Certification: CEH (EC-Council), Microsoft Azure Fundamental (AZ-900).

EXPERIENCE

Securelytics SDN BHD— Petaling Jaya, Malaysia

Security Analyst & Engineer

January 2024 – Present

- Installed and configured Splunk server components for security log monitoring, enabling centralized visibility into security events and supporting operational monitoring requirements.
- Actively maintain Server responsible for preventative maintenance and health check.
- Led as security consultant for Security Posture Assessments , Wireless Security Assessments, and Host Vulnerability Assessments for government and private sector clients, identifying security weaknesses and preparing remediation-focused reports for technical and management stakeholders.
- Collaborated with project teams, associate consultants, and client stakeholders to deliver cybersecurity assessment and infrastructure implementation projects within agreed timelines.
- Conducted host and internal network vulnerability assessments using Nessus, validated findings, prioritized risks, and produced detailed remediation reports to support vulnerability management and security hardening activities.
- Work shift 24/7 monitoring, triage and validating security alerts through SIEM and XDR platforms, analysing suspicious activity and escalating potential incidents for further investigation and response within SLA agreement.
- Performed basic firewall configuration to secure client data transmission, enforce access control policies, and reduce exposure to unauthorized network traffic.

- Configured CPE devices by applying Cloud ACS connection settings, enabling successful device registration and remote provisioning.
- Supported internal ISO 27001:2022 tool validation and review activities by checking security tools, documentation.
- Led internal phishing awareness assessment exercises to evaluate employee security awareness and support client-side improvement in phishing readiness.
- Participated in Web Application Performance Assessment and preventive maintenance projects, supporting technical testing, monitoring, documentation, and project delivery.
- Performed preventive maintenance on more than 200 client endpoints.

DIASPORA SDN BHD– Petaling Jaya, Malaysia

Security Analyst (On Job Training)

Oct 2023 – December

- Supported cybersecurity awareness initiatives by developing awareness materials, including posters and banners, and contributing ideas for client awareness programs.
- Assisted in the creation, review, and maintenance of ISO 27001:2022 policies for internal and client environments.
- Participated in Security Posture Assessment exercises using Kali Linux tools including Burp Suite, Metasploit, and Nmap in controlled lab environments.
- Conducted vulnerability and compromise assessment demonstrations using Metasploitable environments.
- Presented comparisons between Compromise Assessment and Vulnerability Assessment methodologies with recommendations for open-source tools such as Wazuh and Velociraptor.
- Collaborated with senior ISMS personnel in policy documentation and security compliance activities.

MIMOS BHD – Kuala Lumpur, Malaysia

Trainee (internship)

Mac 2023 – Sept 2023

- **Project:** Blockchain Hyperledger Fabric Research and Development.
- Contributed to the patent of performance testing in Hyperledger Fabric using benchmarking tools and company testing tools.
- Assist Research officer doing research and development with newer versions of Hyperledger Fabric to implement for future projects.
- Contribute to research and development implementation of Grafana in performance testing for new versions of Blockchain Framework.

EDUCATION

UNIVERSITI PERTAHANAN NASIONAL MALAYSIA – Kuala Lumpur

Oct 2020 – Sep 2023

Bachelor Degree Computer Science System Security; CGPA: 3.54;

- **Core Subjects:** Discrete Mathematics, Computer Architecture, Statistics, Object-Oriented Programming (JAVA) , Database (My SQL), Computer Network (CISCO), System Analysis and Design, Data Structure, Programming, Web Development, Computer Security and Network, Software Engineering, Cryptography, Digital Forensics, Ethical Hacker, Artificial Intelligent, Defensive Programming, Information Security Management, Wireless Network Security
- **Final Year Project:** System monitoring and detection browser opening in computer lab UPNM. (presented at DSS EXHIBITION)
