

MUHAMMAD ZULFAQAR BIN NORSAIDI

Security Analyst & Engineer

Kuala Lumpur, Malaysia | mzulfa1212@gmail.com | linkedin.com/in/mzulfaqar | github.com/Zzulfaqar

PROFESSIONAL SUMMARY

Security Analyst and Engineer with experience establishing and maintaining Splunk SIEM infrastructure, performing 24/7 SIEM and Cortex XDR alert triage across 500+ endpoints, and delivering security posture, vulnerability, wireless, and awareness assessments. Completed a seven-domain Security Posture Assessment in under three weeks with technical reporting and C-level presentation material.

CORE CAPABILITIES

Security Operations	Splunk monitoring, Cortex XDR alert triage and validation, log analysis, incident escalation, SLA-driven 24/7 operations
Assessment	Security Posture Assessment, Nessus vulnerability assessment, wireless security, Nmap, Metasploit, Burp Suite, Kali Linux
Engineering	Linux server maintenance, firewall configuration, network security, CPE and Cloud ACS configuration, AWS EC2, Azure fundamentals
Monitoring & Testing	Grafana, Prometheus, Docker, JMeter, Shell scripting, Git, MySQL
Governance	ISO 27001:2022 support, policy review, phishing awareness, technical and executive reporting

PROFESSIONAL EXPERIENCE

Security Analyst & Engineer

Securelytics Sdn. Bhd., Petaling Jaya | January 2024 - Present

- Installed and configured Splunk server components for centralized security-log monitoring; continue to support preventive maintenance and health checks.
- Perform 24/7 SIEM and Cortex XDR alert monitoring, triage, validation, and escalation across 500+ endpoints within SLA requirements.
- Lead and support Security Posture Assessments, wireless security assessments, and host vulnerability assessments for government and private-sector clients.
- Conduct Nessus-based host and internal-network assessments, validate findings, prioritize risk, and prepare remediation-focused reports.
- Collaborate with consultants, project teams, and client stakeholders to deliver assessment and infrastructure projects within agreed timelines.
- Support firewall, CPE, Cloud ACS, Linux-server, endpoint-maintenance, ISO 27001:2022, and phishing-awareness activities.
- Performed preventive maintenance on more than 200 client endpoints.

Security Analyst - On-the-Job Training

Diaspora Sdn. Bhd., Petaling Jaya | October - December 2023

- Supported cybersecurity-awareness initiatives and ISO 27001:2022 policy creation, review, and maintenance.
- Participated in controlled assessment exercises using Kali Linux, Burp Suite, Metasploit, and Nmap.
- Demonstrated vulnerability and compromise assessment concepts in Metasploitable environments.
- Compared assessment methodologies and evaluated Wazuh and Velociraptor for open-source security use cases.

Research and Development Intern

MIMOS Berhad, Kuala Lumpur | March - September 2023

- Supported Hyperledger Fabric research, development, benchmarking, and performance testing.
- Contributed to patent-related performance-testing work using benchmarking and organizational testing tools.
- Implemented Grafana monitoring to support performance testing for newer blockchain framework versions.

CERTIFICATIONS

Certified Ethical Hacker (CEH) - EC-Council | Microsoft Azure Fundamentals (AZ-900)

EDUCATION

Bachelor of Computer Science (System Security)

Universiti Pertahanan Nasional Malaysia | October 2020 - September 2023 | CGPA: 3.54

Final Year Project: computer-laboratory browser monitoring and detection system, presented at the DSS Exhibition. Relevant study included computer and network security, ethical hacking, digital forensics, cryptography, wireless security, information security management, defensive programming, networking, databases, and software engineering.

LANGUAGES

Malay - Native/Fluent | English - Professional proficiency
